

HLF

THE PREMIUM FLIPAWAY GATE FOR TRUCKS AND TRAILERS

A HEAVY-DUTY LIFTGATE WITH LIFTING CAPACITIES OF 2,500 LB., 3,000 LB., 4,000 LB. AND 5,000 LB.

A versatile design that offers maximum convenience, performance and flexibility. The two-section, lightweight loading platform can be folded and stored beneath the vehicle floor, enabling easy access to the cargo area without activating the lift. The liftgate is welded to the frame of the vehicle chassis to ensure optimum safety.

- **Galvanized finish standard:** Extend product lifecycle with the best corrosion resistance finish in the industry.

- **Reliable operation:** All key components are designed to perform at their best. The electrical system has a dedicated ground wire, fully potted toggle switches, and two solenoids to keep you moving. The hydraulic system is fully closed to keep contaminants out while the cylinders stay protected in transit since they are fully retracted.
- **Safer operation:** The large aluminum platform with cart stops deployed offers plenty of

working room and allows for easy handling of pallet loads, and the torsion-assist, lightweight platform folds away easily for the driver.

- **Slip resistance:** The aluminum platform comes with a ridged surface to help with grip, creating a non-slip environment.
- **Simplified maintenance:** External curbside pump for safe and easy access and grease fittings at all major hinge points.
