Heavy Duty Commercial Units

Whether you're a self employed home remodeler looking for a cover for your truck or the purchasing manager for a construction company, our Heavy Duty Commercial Units can be completely customized to meet your individual needs. Designed to work as hard as our customers, our caps have been used for years by contractors, utility companies, construction companies and military units. Each Heavy Duty Commercial Unit is built with a double welded, fully boxed aluminum frame attached to heavy duty base rails for superior strength. Reinforcements to the frame, industrial strength hardware and automotive quality locks are then added along with a .030 aluminum skin that is available in several standard colors or can be painted to a color code of your specification. An array of rear doors, roof racks, side doors, steel tool bins and other options are available for you to fully customize your cap.

Heavy Duty Commercial Unit Standard Features

All Welded Aluminum Reinforced Frame
.030 Exterior Aluminum Skin
Powder Coated Black Moldings With Black Vinyl Trim
Stainless Steel Drop-T Handles
Mitered Front Picture Window
Side Access Doors
Half Gate Style Rear Door
Easy Lift Gas Props On All Side And Rear Doors
Exterior Mount LED Brake Light

To See Which Optional Features Are Available Please Refer to the Design Your Own Heavy Duty Commercial Unit Section At The End Of This Literature.
